### *The City of Stillwater has made a temporary change to their water disinfection and treatment method from chloramine to free chlorine.*

51 East Water customers may notice a change in the taste or smell of their drinking water. This is due to Stillwater needing to make a temporary change to their disinfection process. Despite possible changes in taste or odor, the water remains safe to drink. Allowing the water to run through your faucets for a short period prior to use may minimize any taste or odor issues. The change occurred Wednesday evening, and we apologize that we were not able to provide advance notice regarding this change. This temporary change from chloramines to free chlorine is one that is made periodically by many water systems around the country. Stillwater will switch back to the disinfection method our customers are familiar with (chloramines) in the near future. If you have additional questions, please contact our office at (405) 372-1151.

### **We're Hiring**

We are currently accepting applications for a Water Operator position(s). No experience required. A valid driver's license is required. DEQ Operator certification is a plus, but not required.
